NOTICE OF ALLOWANCE

Allowable Subject Matter

1. It is in the opinion of the examiner that the art of record neither anticipates nor renders obvious “a lift mechanism including a lifting plate which is disposed below the lower die and a lifting rod which is operatively coupled to a lower die lift cylinder, and which is operable to raise the lower die above an upper end of the die holder via the lifting plate when the lower die is unclamped” in combination with the rest of the claimed limitations set forth in the independent claim.

2. Further searching by the examiner yielded additional prior art as follows:

Yonezawa (4,301,673) discloses a lower die assembly (first die 5) for a pressing machine (1) comprising a die holder (bolster 3 and Figure 1), a clamp mechanism (hydraulic clamp 7 and Figure 1), and a lift mechanism (die lifter unit 9, lifter body 13, a pair of hydraulic cylinders 22 and Figure 2 and 4).

Smith (3,673,908) discloses a lower die assembly (mating tapered die member or stripper plate 26) for a pressing machine (fineblanking press 10) comprising a die holder (frusto-conical cavity 25 and Figure 2), a clamp mechanism (“locking means comprise a pair of locking pins (48)” Column 2, lines 1-2, also see Column 1, lines 65-70; Column 3, lines 20-26; and Column 6, lines 51-53), and a lift mechanism (“the fluid moves the piston rods 82 to lift or dislodge or eject the die members 26 and 27 for a quick interchangement” (Column 5, lines 19-21) and a series of three double acting fluid cylinder means 78).

Art Unit: 3725

3. However the above prior art fails to disclose a reasonable combination of "a lift mechanism including a lifting plate which is disposed below the lower die and a lifting rod which is operatively coupled to a lower die lift cylinder, and which is operable to raise the lower die above an upper end of the die holder via the lifting plate when the lower die is unclamped." Therefore, it is concluded by the examiner that claim 1 of the present invention are allowable.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure and further show the state of the art: US Patents 6,134,938 and 3,269,168.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Teresa M. Bonk whose telephone number is (571) 272-1901. The examiner can normally be reached on M-F 7:30AM - 5PM with alternating Fridays.
